DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al (US 5,967,653)

Regarding claim 1 and 7-10, Miller et al ('653) discloses a light projector having a light guide 20, having a end face towards the light source 23, a internal face 26, extending longitudinally of the guide (figure 6), a light a sectional shape of the light guide in a direction orthogonal to the longitudinal direction of the light guide has two opposite parabolas and a line segment corresponding to the emitting face 22.

Regarding claim 2, the light guide on a side of the emitting face is substantially parallel to the optical axis as shown in figure 6.

Claims 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al ('963).

Regarding claims 11-14, Miller et al ('653) discloses a light projector having a light guide 20, having a end face towards the light source 23, a internal face 26, extending longitudinally of the guide (figure 6), a light a sectional shape of the light

guide in a direction orthogonal to the longitudinal direction of the light guide has two opposite parabolas and a line segment corresponding to the emitting face 22.

Claims 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al ('963).

Regarding claims 15-17, Miller et al ('653) discloses a light projector having a light guide 20, having a end face towards the light source 23 which emits the light in the light guide in a line shape (figure 6), a internal face 26, extending longitudinally of the guide (figure 6), a light a sectional shape of the light guide in a direction orthogonal to the longitudinal direction of the light guide has two opposite parabolas and a line segment corresponding to the emitting face 22.

Allowable Subject Matter

Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: no where in the prior art is found two illuminating units arranged as to cause lights emitted from the emitting faces of the light guide thereof to irradiate the same area of a face of the document being illuminated.

Response to Arguments

Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
